

INTEGRATED MANAGEMENT ACCOUNTS ACKNOWLEDGMENT

Purpose:

Integrated Management Account (IMA). A special tool for trading firms and professional money managers who need to handle (trade) multiple accounts simultaneously. This is a logical evolution of our on-line dealing services that will enable managers to place a trading order with a single click for all their accounts. This will allow a trader or account manager to consolidate all necessary trades in one transaction.

Name of Designated Trading Agent: _____
Email Address of Designated Trading Agent: _____

Clients should be aware that:

- All customers' accounts will be combined into one major account.
- All accounts will be traded as one.
- Margin per IMA will be established by the MG's dealing desk.
- The computer system will automatically distribute all profits and losses accordingly.
- The Integrated Account Trader is the only person who has the right to place trades and therefore oversees all trading decisions.
- The trader establishes all rules and provisions for such accounts (such as minimum account size; time investment period; commissions and incentive fees or any other financial arrangements between trader and investor).
- It is the client's/investor's responsibility to find out all necessary information about the trader and make sure that all arrangements are discussed and understood.

Please select one of the following:

Please change the commission fee designated on the Limited Power-of-Attorney from: _____ to: _____ and I understand that the amount of commission I am charged by the Designated Trading Agent is dependent on the percentage of funds I have in my trading account as a percentage of the total sum of the funds under this IMA's management. All other conditions of the Limited Power-of-Attorney still apply.

Do not change my Designated Trading Agent's commission fee.

Disclosure:

The Integrated Account Trader (Manager) is an independent agent that offers his service to the investment community.

The Integrated Account system is a product designed exclusively for professional traders. Money Garden shares no responsibilities for any actions that the trader may take while using this system.

Clients should be aware that guaranteeing any return is illegal. In addition, Money Garden is not responsible for any claims or assurances made by traders.

I have read and understood all of the above and all additional questions on my part have been answered.
